Abbreviations Used in the Report

Abbreviation	Definition
CAMP	College Assistance Migrant Program
CCR	College and Career Ready
CNA	Comprehensive Needs Assessment
COE	Certificate of Eligibility
EL	English Learners
ESEA	Elementary and Secondary Education Act
Gap group	Per KDE: Groups of students combined into one large group whose scores are used to determine whether schools/districts are closing achievement gaps; demographic categories include African American, Hispanic, American Indian/Native American, limited English proficiency, poverty, and disability.
GED	General Educational Development
ILP	Individual Learning Plan
KDE	Kentucky Department of Education
KMPAC	Kentucky Migrant Parent Advisory Council
KPREP	Kentucky Performance Rating for Educational Progress
LEA	Local Education Agency, aka District
MEP	Migrant Education Program
MPO	Measureable Program Outcome
NCLB	No Child Left Behind Act of 2001
OME	Office of Migrant Education (U.S Department of Education)
OSY	Out of School Youth
PAC	Parent Advisory Council
PASS	Portable Assisted Study Sequence
PFS	Priority for Service
SDP	Service Delivery Plan
SEA	State Education Agency
USDOE	United States Department of Education

EXECUTIVE SUMMARY

This report provides data regarding outcomes obtained and services provided by the KY Migrant Education Program (MEP). It is one component of the KY MEP's ongoing work to determine the effectiveness of services to migrant children and youth. The report was prepared by Arroyo Research Services, an education professional services firm that helps education organizations through research, measurement, evaluation, and consulting services.

This summary reviews the purpose of the evaluation, the structure of the MEP, the methodology used to conduct the evaluation, and provides findings in the areas of enrollment, services, and outcomes for each specific area identified in the Service Delivery Plan. Outcome sections address the State Performance Target for the general population in that area, the Measurable Program Outcome (MPO), and progress toward the MPO. Preliminary status of implementation goals is reported in the full report but excluded from the Executive Summary.

Purpose

The evaluation builds on the KY MEP Comprehensive Needs Assessment (CNA) and updated KY MEP Service Delivery Plan (SDP). The KY MEP CNA was revised through a broad-based statewide process that culminated in a Comprehensive Needs Assessment Final Report in July 2012. The revised CNA informed development of a new KY MEP SDP in 2013 which was further updated in 2014. The revised SDP contains measureable outcomes and indicators that inform this evaluation plan and associated statewide data collection procedures.

This report discusses preliminary findings from the review of the KY MEP related to three overarching questions (further refined below):

- How is the KY MEP student population changing over time?
- To what extent are programs being implemented?
- To what extent are programs for MEP students producing the desired student outcomes?

In answering these questions, the evaluation seeks to provide a statewide perspective on services and their impact to enable the KY MEP to make programmatic decisions based on data. The evaluation is also intended to communicate what is known about services and outcomes to various stakeholders. Findings were shared with state education policy makers and regional coordinators in June 2015, and will be distributed to district MEP staff. Preliminary evaluation findings were shared with the Kentucky Migrant Parent Advisory Council (KMPAC) for discussion with migrant families in April 2015; complete evaluation findings are expected to be shared with the KMPAC in Fall 2015. The report is also intended to communicate with the U.S. Department of Education's OME about the

extent to which statutory requirements are met in responding to the needs of migrant youth in achieving challenging academic standards.

The KY MEP is funded under the federal MEP created in 1966 under Title I, Part C, of the Elementary and Secondary Education Act (ESEA), amended most recently in 2001 through the No Child Left Behind Act (NCLB). According to statute, a migratory child, in Kentucky, “is one who is, or whose parent or spouse is, a migratory agricultural worker, including a migratory dairy worker, or migratory fisher, and who, in the preceding 36 months, in order to obtain, or accompany such parent or spouse, in order to obtain, temporary or seasonal employment in agricultural or fishing work and has moved from one school district to another” (NCLB Sec. 1309[2]). The KY MEP provides supplemental educational services to the state’s children, youth, and families of migratory farmworkers through this same statute. Under ESEA, the MEP focuses on alleviating barriers to successful educational achievement due to the migratory lifestyle, including disruption in schooling due to repeated moves, poverty, social isolation, and language barriers. The mission of the KY MEP is to provide educational and human resource service opportunities which strengthen and enhance the development of the migrant child and the migrant family.

Program Structure

The KY MEP is administered through the KDE Division of Consolidated Plans and Audits. KDE provides sub-grants to LEAs that apply for MEP funding to administer services at the local level. Currently, the KY MEP consists of 37 school districts administered under four regional administrative centers (see Figure 13). Over 60% of Kentucky’s migrant students are concentrated in the northeastern and central regions. Tobacco is the primary agricultural enterprise in the state and remains a top qualifying activity for the MEP, through all stages of labor intensive production from preparing the soil and sowing seeds (February-April) to stripping and bulking (November-January). Services are provided for Pre-K students, K-12 students, and Out-of-School Youth (OSY) who are age 21 and younger and not attending school, and parents.

The evaluation process is embedded in the MEP's continuous improvement cycle, including the CNA and SDP processes. Under § 200.83 of ESEA, an SEA that receives MEP funds must develop and update a written comprehensive state plan (based on a current statewide needs assessment) that, at a minimum, has the following components:

- Performance targets that the state has adopted for all children in reading and mathematics achievement, high school graduation, and the number of school dropouts, school readiness, and any other targets identified for migrant children;
- Needs assessment to address the unique educational needs of migrant children resulting from the migratory lifestyle and any other needs in order for them to participate effectively in school;
- Service delivery strategies that the SEA will pursue on a statewide basis to address the identified needs;
- Evaluation of the effectiveness of the program (including measurable program goals and outcomes as authorized under Sec. 1306 of NCLB).

This evaluation report is framed to measure the implementation and effectiveness of the strategies and Measureable Program Outcomes (MPOs) outlined in the 2013 SDP as further amended in 2014 (based on the state's initial CNA conducted in 2012). The MPOs were

based on a gap analysis between migrant and non-migrant student achievement and are outlined in the sections that follow. The MEP goals address each aspect of the Seven Areas of Concern.

During the 2014-2015 period, the evaluation team provided consultation, data collection, and analysis through multiple mechanisms to bolster the capacity of the KY MEP to evaluate its services. These efforts included training on data collection and use, working on site in each region regarding the Service Delivery Plan and the core measures related to it, consultation on data collection and analysis, and review, compilation and analysis of program and outcome data.

Data for this report was drawn from the statewide migrant student data system, MIS2000, Infinite Campus, Migrant Parent Surveys, extensive implementation data collected by the KY MEP program, and accountability data available from various divisions of KDE. Each is discussed in further detail in the body of the report.

The report uses mixed methods that include quantitative and qualitative analyses appropriate to the specific evaluation questions and data. Specific analyses include:

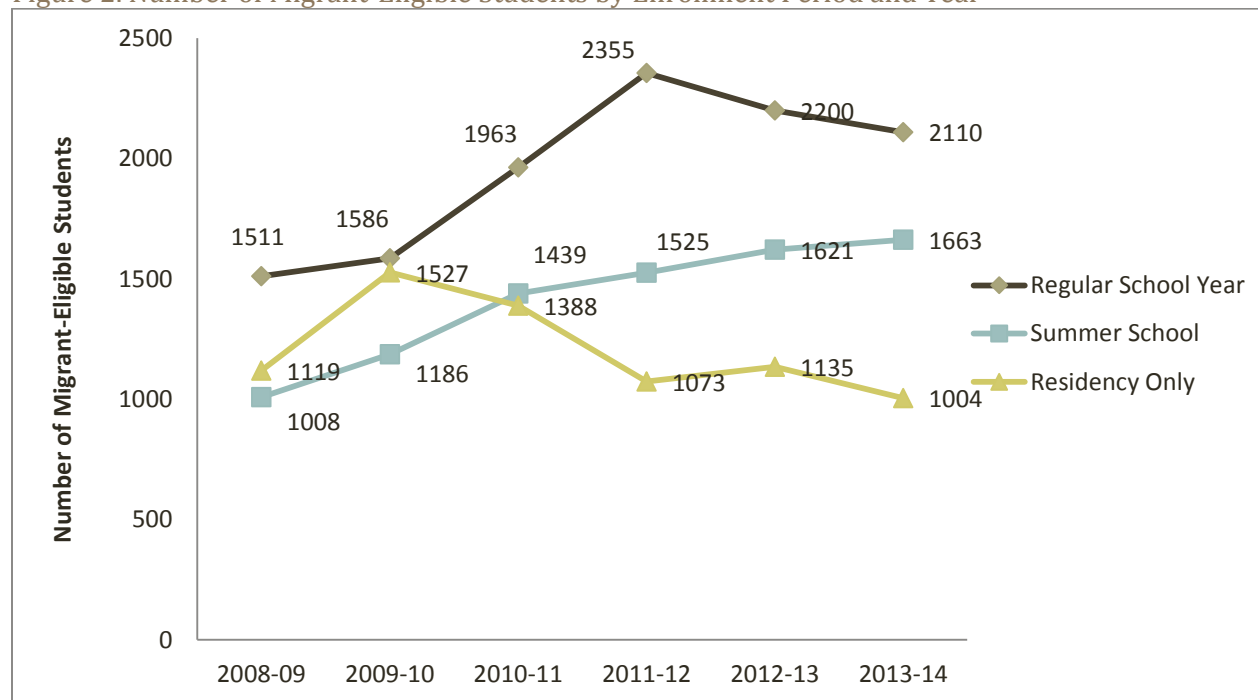

- **Descriptive Statistics:** The evaluators use counts, means, and percentages to describe student enrollment, student characteristics, services provided and student performance.
- **Trend Data:** Where possible, we analyze data across multiple years using identical decision rules, cut points, and data analytical procedures to show comparable data as it changes over time.
- **Gap Analysis:** Analyses of differences between migrant students and other Kentucky students is conducted through a gap analysis and analyses of gap trend data using data for the non-duplicated gap group and other comparison groups as described in each section.
- **Performance Analysis:** Where student outcome data are available, we report it by performance level as determined by the Kentucky state assessment system. This typically includes use of stacked bar charts that compare the distribution of migrant and non-migrant student performance levels across years.
- **Enrollment Analysis:** Enrollment and withdrawal patterns are shown by date in order to better understand the migratory patterns of Kentucky migrant students.

Findings: Enrollment

The Kentucky Migrant Education Program enrolls students in three separate categories: Regular School Year, Summer School, and Residency Only. Students categorized as Residency Only are typically Out-of-School Youth or pre-school age students. In the charts below, enrollments are presented for each enrollment type. Note that the same student enrolling in both the Regular School Year and Summer School, for example, is represented in each category. Figure 14 shows enrollment by period and year, and shows:

- Regular School Year enrollment declined from 2,355 in 2011-2012 to 2,110 in 2013-2014, a 10% decline
- Summer School enrollment increased from 1,525 in 2011-2012 to 1,663 in 2013-2014, a 9% increase, and has been steadily increasing in each of the last six years
- Residency Only enrollment declined from 1,073 to 1,004 from 2011-2012 to 2013-2014, a 4% decrease

Figure 2. Number of Migrant-Eligible Students by Enrollment Period and Year

Source: MIS2000.

Examining enrollment trends by region shows further information about where enrollment is changing the most. Enrollment figures can be driven by changes in migratory labor, changes in qualifying activities, and changes in recruitment strategies. Among the regional enrollment findings:

- From 2011-2012 to 2013-2014, Regular School Year enrollment declined slightly in the Western region, was steady in the Central region, increased slightly in the Northeastern region, and decreased significantly in the Southeastern region (from 651 to 424, a 35% drop)

- Summer School enrollment increased notably in the Southeastern region, from 234 students in 2011-2012 to 344 in 2013-2014, a 47% increase, and increased in the Western region from 279 to 319 during the same period, a 14% increase
- Residency Only enrollment dropped significantly in the Northeast, from 435 in 2011-2012 to 280 in 2013-2014, a 36% decline, and fluctuated widely each year in the Southeastern region.

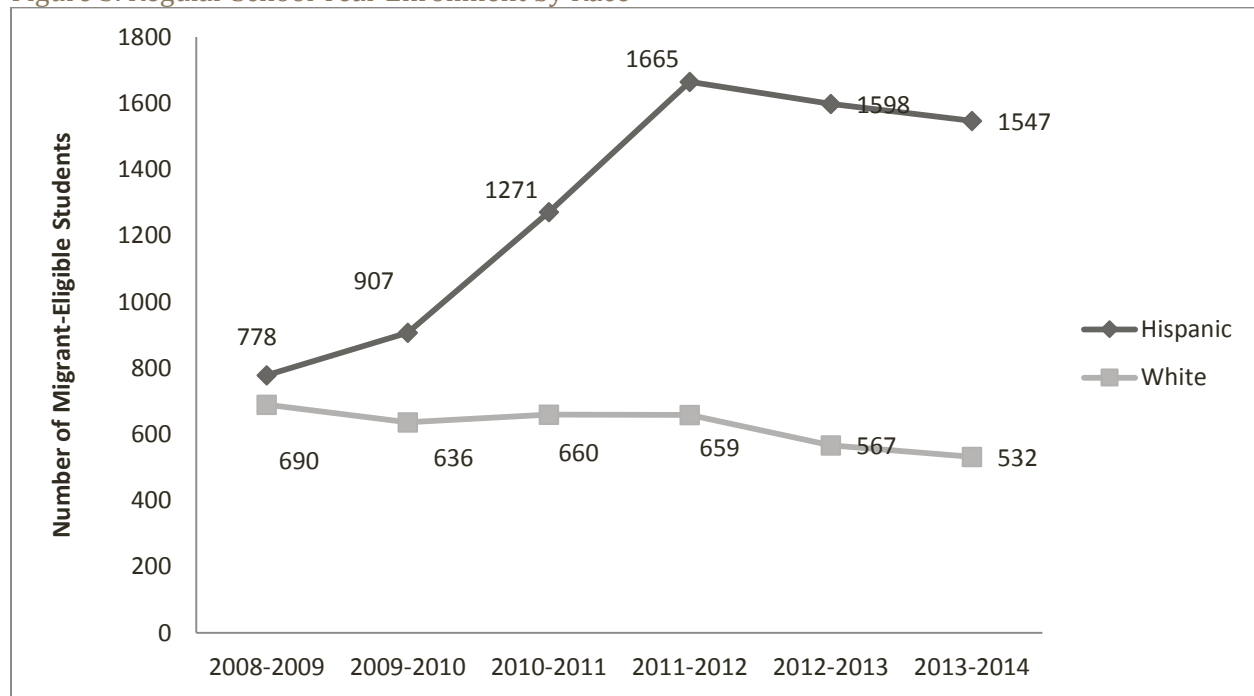

Grade level enrollment trends include:

- High school students are an increasing proportion of the Regular School year population, changing from 13% of Regular School Year enrollees in 2010-2011 to 17% in 2013-2014.
- The number of High School students also increased in Summer School, from 165 in 2010-2011 to 217 in 2013-2014
- Out-of-School Youth declined in both absolute numbers and as a proportion of the overall Residency Only population

Nearly all migrant students in Kentucky are Hispanic or white (see Table 10), and unlike the significant change in the distribution of Hispanic or white students reported in the 2012 evaluation report, the distribution by race/ethnicity was relatively stable from 2011-2012 to 2013-2014. Specific findings regarding race/ethnicity include:

- 99% of Kentucky migrant students are either Hispanic or white
- During the regular school year, the number of white migrant students declined from 659 in 2011-2012 to 532 in 2013-2014, a 19% decline. During this period, however, all migrant enrollments declined, so white students as a proportion of all regular school year students only declined from 28% to 25%.
- During the regular school year, the number of Hispanic students also declined from 1,665 to 1,547, a 7% decline, while the proportion of migrant students that were Hispanic was rose slightly from 71% to 73%.
- Summer school enrollment gains were achieved primarily among Hispanic youth. Overall enrollment in summer school rose from 1,525 in 2012 to 1,663 in 2014. Within summer school, the number of white students enrolled fell from 397 (26%) to 325 (20%), while the number of Hispanic students rose from 1,103 (72%) to 1,313 (79%), from 2012 to 2014.

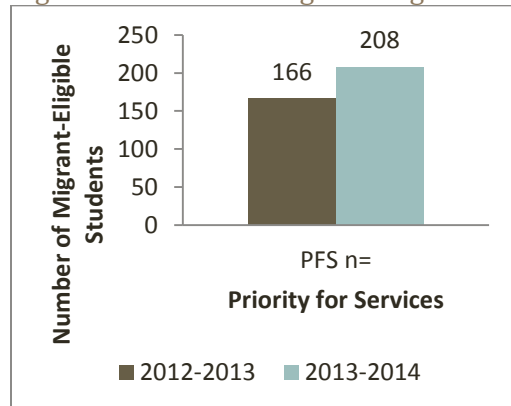

Figure 3. Regular School Year Enrollment by Race

Source: MIS2000

The US Office of Migrant Education requires each state Migrant Education Program to identify students which are a Priority for Services (PFS), and expects that special attention is paid to these students. The Kentucky MEP updated and clarified the definition of which students would receive this designation beginning in the 2012-2013 school year. Prior year data is therefore not comparable and is therefore not presented side-by-side with the 2012-2014 data about PFS students and their services. As shown in Figure 16 and Table 11, 166 students were identified as PFS in 2012-2013 and 208 were identified as PFS in 2013-2014. All identified students were school age. Within the PFS population, a lower proportion of high school students and higher proportion of elementary school students were identified in the 2013-2014 school year.

Findings: Services

Within each enrollment period, the evaluators calculated the percentage of students who received each individual service provided by the MEP, as shown in Table 12. Findings related to service provision include:

- The percentage of students served in the Regular School Year rose notably in each area of service from 2011-2012 through 2013-2014

- The percentage of students receiving Regular School Year counseling services or referrals doubled from 2011-2012 to 2013-2014
- The percentage of Regular School Year students receiving mathematics instruction rose 20% from 2011-2012 to 2013-2014
- The percentage of Regular School Year students receiving reading instruction rose 17% from 2011-2012 to 2013-2014
- The proportion of students receiving Summer School instructional services remained relatively constant during the evaluation period
- The proportion of students receiving Summer School counseling, support services and referrals rose dramatically during the evaluation period; for counseling, e.g., 19% of summer school students received this service in 2012 while 43% did so in 2014

Table 2. Percent of Migrant-Eligible Students Receiving Services by Enrollment Period and Year, All Students

Source: MIS2000

Table 13 shows the percent of students receiving services by grade level for the Regular School Year. Findings of note:

- While service provision was generally individualized to meet the specific needs of each student, the overall level of service was very high, with 95% of eligible migrant students in Elementary and Middle School, and 94% of eligible migrant High School students, receiving at least one supplemental service.
- Support services were received by the highest percentage of each grade level
- Although elementary and middle school students were most likely to receive instructional services, a relatively high percentage of OSY received reading instruction, primarily aimed at developing English language proficiency using mini-lessons

Table 3. Percent of Migrant-Eligible Students Receiving Services within Grade Level, Regular School Year, 2013-2014

Grade Level	Service						If Ever Served
	Reading Instruction	Math Instruction	Other Instruction	Counseling Service	Support Service	Referral	
Age 3-5	47	43	35	26	80	69	90
Elementary (Grades K-5)	73	64	49	48	90	75	95
Middle (Grades 6-8)	68	62	48	57	91	80	95
High (Grades 9-12)	59	54	47	60	90	79	94
Out-of-School*	41	29	44	50	85	64	89

Source: MIS2000

Note: * OSY figures are for entire period, not Regular School Year. Services include migrant funded, mixed funded, and other (M, B, O codes in MIS2000).

By design, Priority for Services students are more likely to receive academic services than the general migrant population.

- 78% of PFS students receive reading instruction, 71% receive math instruction, and 62% receive other instruction, all much higher figures than for the overall migrant student population.
- In the 2012-2013 school year, 99% of PFS students received services, while 96% of PFS students did so in 2013-2014.
- The percentage of non-PFS students increased substantially from 2012-2013 to 2013-2014 in each category; the percentage of PFS students receiving services during the same periods increased in each category except for the already high rates of referral and support services.

Table 4. Percent of Priority for Services (PFS) Migrant-Eligible Students Receiving Services during the Regular School Year, by Year, Grades K - 12

Enrollment Period	Service	Year			
		% served, 2012-2013		% served, 2013-2014	
		Non-PFS	PFS	Non-PFS	PFS

Source: MIS2000. 2012-2013 PFS n=166, non-PFS students in grades K-12 n=1,857; 2013-2014 PFS n=208, non-PFS in grades K-12 n=1,772

*Indicates percent of students who received at least one type of service.

Findings: Reading Language Arts and Mathematics

State Performance Target

Increase the average combined reading and mathematics proficiency ratings for all students in the non-duplicated gap group from 33.0% in 2012 to 66.5% in 2017.

MPO

Reduce the gap by 3% points per year between migrant students and the reported gap group on the average combined reading and mathematics proficiency ratings. 2012 Benchmark: 26.5% for migrant students, 33.0% for gap group.

MPO Status

Not Met. As shown in Figure 6, the gap between migrant students and the unduplicated gap group which represents students from populations that traditionally underperform the state averages, fell slightly from a 6.6 percentage point difference in 2012 to a 5.8 percentage point difference in 2014. At the same time, the percentage of migrant students performing proficient or higher rose 22%, from 26.4% to 32.3%. Gap group performance, however, also rose slightly during the same period.

Discussion

Kentucky migrant students demonstrated gains in both mathematics and reading proficiency during the period of the evaluation. Results are shown as a weighted average of reading and mathematics in Figure 6, for reading in Figures 7, 8 and 9, and for mathematics in Figures 10, 11 and 12. Note that the comparison to the “gap group” is to the non-

duplicated gap group as defined and published by KDE, which is intended to be a summary figure for the performance of “groups of students combined into one large group whose scores are used to determine whether schools/districts are closing achievement gaps; demographic categories include African American, Hispanic, American Indian/Native American, limited English proficiency, poverty, and disability.” Within the gap group, students in these groups are counted only once per student, even when they are in multiple groups. Additionally, KPREP specific findings of note in the detailed figures below include:

- Although migrant student combined proficiency rose from 26.4% to 32.3% proficient from 2012 to 2014, a 22% increase, the gap group performance also rose, particularly from 2013 to 2014; the gap decreases slightly from 6.6 percentage points to 5.8 percentage points.
- As shown in Figure 7, the percent of migrant students proficient in reading, particularly among non-PFS students, was the largest contributor to the combined proficiency scores, with 34% of migrant students performing at the proficient or higher level in 2014 (36% of Non PFS migrant students, and 19% of PFS migrant students).
- The largest increase in migrant student performance in reading occurred between the 2013 and 2014 KPREP administrations, rising from 29% to 34% proficient, a 17% increase.
- Migrant students were substantially less likely to score at the Novice level in 2014 than they were in 2012, dropping from 61% of PFS students in 2012 to 44% of PFS students in 2014, and 41% of non PFS students in 2012 to 24% of non PFS students in 2014. This was a 28% decline in Novice level results for PFS students.
- The reading performance gap shrunk in the elementary grades (Figure 8), and grew in the middle school grades (Figure 9), from 2012 to 2014.
- Migrant student performance on the KPREP Mathematics assessment showed steady gains from 2012 through 2014, rising from 25% proficient in 2012, to 28% proficient in 2013 and 30% proficient in 2014. This is a 20% gain from 2012 to 2014.
- Migrant students performing at the Novice level in KPREP Mathematics declined from 33% (53% PFS, 29% Non PFS) to 26% (37% PFS, 24% non PFS) from 2012 to 2014, a 27% decline.
- The gap between elementary school migrant students and all Kentucky students and also gap group students on KPREP mathematics grew during the 2012-2014 period (Figure 11).
- The gap between middle school migrant students and gap group and all KY students on KPREP mathematics declined slightly during the 2012-2014 period (Figure 12).

Findings: Graduation

State Performance Target

Increase the average four-year graduation rate from 76% to 90% by 2015. Increase the percentage of students who are college- and career-ready from 34% to 68% by 2015.

MPO

Increase the four and five year cohort graduation rates to 88% by 2015. Increase the percentage of students who are college and/or career ready to 41% by 2015.

MPO Status

Not Yet to Target Date. The MEP progress toward achieving its graduation targets may be hindered by two factors that are endemic to migrant programs. First, the size of the cohort included in the calculation can change dramatically from year to year, and because of the relatively small number of migrant high school students, can fluctuate substantially due to changes in migratory patterns. Second, the state data used to determine migrant graduation rates is considerably more reliable since 2013, and therefore later reporting years are expected to be more stable than earlier ones.

Discussion

Graduation data for migrant and all Kentucky students was drawn from the Kentucky School Report Card (available at <http://applications.education.ky.gov/SRC/>), and includes statewide and subpopulation-specific data for all major state level outcomes. Table 16 includes the four-year cohort graduation rates for students who started grade 9 in 2009 (expected date of graduation: 2013), and students who started grade 9 in 2010 (expected date of graduation: 2014). Reliable migrant student graduation data for prior periods was not calculated following the cohort graduation formula used by KDE. Table 17 shows the percent of migrant and Gap group students who are determined by KDE to be College and Career Ready in the 2013 and 2014 cohorts. Findings and comments regarding graduation:

- The graduation rate for the all students and migrant students group increased slightly from 2013 to 2014 while the graduation rate for migrant students declined by 10 percentage points.
- Very little definitive data is available about non-school factors that are affecting migration, high school drops without migratory moves, or other events driving the graduation rate for migrant students.
- Migrant students demonstrated approximately the same level of College and Career Readiness as defined by KDE in 2013 and 2014 (30%, Table 9), which the CCR rates for the gap group increased from 40% to 50%.

Table 5. Four-Year Adjusted Cohort Graduation Rates, Expected Date of Graduation 2013 and 2014¹

	2013	2014
All Students	86.1	87.5
Migrant	85.7	75.3

Source: KDE State Report Card, accessed 5/2015 from <http://applications.education.ky.gov/SRC/DeliveryTargetByState.aspx>
Note: for Migrant cohorts, n = 56 for 2013, n=81 for 2014.

Table 6. Percent College and Career Ready, Expected Date of Graduation 2013 and 2014

	2013	2014
Migrant	30.6	30.0
Gap group	40.0	49.9

Source: KDE State Report Card, access 5/2015 from <http://applications.education.ky.gov/SRC/DeliveryTargetByState.aspx>
Note: for Migrant CCR, n= 36 for 2013, n=40 for 2014. For Gap group CCR, n=23,653 for 2013; n=24,135 for 2014.

¹ KDE defines the four-year adjusted cohort graduation rate as follows: "...the number of students who graduate in four years with a regular high school diploma divided by the number of students who entered high school four years earlier adjusting for transfers in and out, émigrés and deceased students."

<http://education.ky.gov/AA/Reports/Pages/Graduation-Rate-Data.aspx>

State Performance Target

Increase the percentage of children ready for kindergarten from 28.1% in 2012 to 64.1% in 2015-16.

MPO

Increase the percentage of migrant preschool students demonstrating kindergarten readiness by 15% of the baseline established in the fall 2013.

MPO Status

Baseline established; progress data not yet available. Baseline results for the Kentucky Kindergarten Readiness Assessment were first available from Fall 2013 and are shown in Table 19. Results are broken out by whether or not a student received MEP services or enrolled in a Pre-kindergarten program in the 2012-2013 school year. As of Fall 2013, 23.5% of migrant pre-school students who entered kindergarten tested as kindergarten ready on the Brigance Screener.

Discussion

Kentucky first established a statewide kindergarten readiness assessment in Fall 2013, providing the KY MEP the opportunity to use an objective statewide readiness measure for the first time. Baseline was established with the initial data shown in Table 19. The evaluation team combined Kindergarten readiness data with service participation data to group results by the types of migrant and preschool services each migrant child received prior to enrolling in kindergarten in Fall 2013. Initial observations include:

- Overall, 23.5% of migrant students were deemed ready for kindergarten on the statewide kindergarten readiness assessment
- 25% of migrant students who received MEP services performed at the Ready or above levels, while 22% of migrant students enrolled in PreK programs and 17% of students who did not receive services did so
- Interpreting results by service type is difficult due to both the relatively low sample size for students participating in preschool, and a lack of information about on what basis students were enrolled in preschool programs; that is, nothing is known about the general preparedness of the students at the time they entered each program

Table 7. 2013 Kentucky Kindergarten Readiness Assessment Results, Migrant Kindergarten Students by Pre-school Services Received

		Not Ready	Ready	Ready with Enrichments	Total
Received MEP Services	Count	121	39	1	161
	%	75.2%	24.2%	.6%	100%
Enrolled in PreK Program	Count	14	4	0	18
	%	77.8%	22.2%	.0%	100%
Did Not Receive MEP Services	Count	25	5	0	30
	%	83.3%	16.7%	.0%	100%
All Migrant Students Total	Count	160	48	1	209
	%	76.6%	23.0%	.5%	100%

Findings: OSY

State Performance Target

Provide and coordinate support services that meet the needs of all students.

MPO

- 1) Increase the percentage of OSY who demonstrate a 20% learning gain measure by pre- and post-test assessment on the SOSOSY “Life Skills” mini-lesson by summer 2014.
- 2) Increase the percentage of OSY who are participating in structured education programs to 4% by summer 2015.

MPO Status

- 1) OSY with 20% learning gain: as of summer 2014, 89% of OSY who completed a mini-lesson with a pre-post assessment demonstrated 20% learning gains or higher.
- 2) OSY participating in structured education programs: **Not Yet to Target Date.** As of summer 2014, using data for the 2013-2014 school year, the baseline for this measure was 3% of OSY reporting as enrolled in a structured education program (GED or HS Diploma).

Discussion

Comprehensive data regarding which OSY received SOSOSY Life Skills mini-lessons associated with their pre and post test results was fully implemented in the 2013-2014 school year and reported to the KY MEP program using individual program reporting

forms. Of the 228 students that received mini-lessons, 202, or 89%, demonstrated a 20% gain on the pre-post assessment associated with the lesson².

Regional programs reported the number of OSY who were enrolled in structured educational programs, including dropout recovery and GED programs. As of summer 2014, reflecting data for the 2013-2014 school year, 3% of OSY were enrolled in programs that lead to either a GED or a HS Diploma.

² KYMEP SASS and Tracking Form Combined, 2014.

Findings: Parent Involvement

Although the SDP does not contain MPOs for parents, it does specify a parent involvement plan that continues to build local Parent Advisory Councils (PACs) and increase the functioning of the statewide PAC. As a part of this effort, the KY MEP has continued to administer statewide parent surveys that address key areas of concern identified in the Comprehensive Needs Assessment process. This section presents the results of the 2014 statewide parent survey. Results for rating scales are provided twice, once in table format, and again as a stacked bar chart which helps make sense of how responses are distributed among the options. Key findings from the survey:

- 321 parents responded to the survey
- Most survey respondents were from the Central region (50%)
- More than half attended at least one training on how to help their child improve in school; 65% attended a school event
- 87% of parents report having discussed their child's academic or social needs with a school official
- 80% report assisting with their child's homework at least once a week; 81% report daily talking with their child about school
- A very high percentage of parents report that they feel welcome when they visit their child's school (88%) and that they know who to talk with when they have questions or concerns about their child at school (89%)
- Migrant parents report very high levels of satisfaction with migrant programs to help with their child's education at home (93%), services their child receives from the migrant program (97%), and services they receive from the program as parents (98%)
- 37% of parents report communicating with migrant education program staff at least once a week

Detailed results of the parent survey are included in the full report.

Recommendations

The Kentucky MEP has made significant progress in strengthening its Statewide Service Delivery Plan and the implementation support and data collection that support it. These results are evident in the progress noted above. To further strengthen the program and enable ongoing review of its data by all parties to the KY MEP, we recommend the following:

Data Collection

- Change the SDP Data Collection protocol as it relates to pre-post curriculum based assessment so that it clearly asks for the number of students who demonstrated progress on the pre and post curriculum based assessments.
- Add enrollment in a GED or HS Diploma program for OSY as a field in the statewide migrant data system
- Revise the data collection process for OSY services, mini-lessons and assessments so that it can more easily be summarized and examined while in progress.
- Consider adding fields to the statewide migrant data system that enable collection of as much of the SDP indicator data as possible within the records attached to individual students, with attendant reports that allow ongoing insight into how each program and the state as a whole is progressing.

Program Improvement

- Consider adding a regular school year supplemental services commitment that establishes baseline expectations for the level of service (e.g. contacts or hours per time period) that LOAs are expected to provide to eligible migrant students. This is especially critical for PFS students to assure that they receive services commensurate with their educational needs. The evaluators note that a service level commitment has been made for summer programs (80 hours), but not for the regular school year.
- Consider adopting a statewide set of recommended practices for when and how to use curriculum-based or formative assessments. The evaluators note that LOAs, at the urging of the State MEP, have been using and tracking the use of local assessments, but that the practices associated with when to do so, how to use results, and how they relate to MEP services varies widely by region.
- Although the state MEP has provided guidance regarding what constitutes and how to track new migrant student welcoming/mentoring, if this remains a part of the migrant program the evaluation team recommends providing further guidance, professional development and sharing regarding recommended practices for new student transitions.
- The KY MEP has made significant improvement in identifying and servicing migrant preschoolers in summer learning programs, and reports relatively high rates of preschool age students enrolled in school. However it is not clear that the reported

rates of preschool enrollment mean the same thing in each region, nor that they tightly match the state level records for preschool enrollment. To bolster preschool enrollment, and to more fully engage families of preschool migrant children in educational activities, the evaluators recommend establishing a statewide emphasis on migrant preschool and kindergarten enrollment assistance, with guidelines and opportunities for professional learning made available from the state MEP.

- To assist in meeting KY MEPs targets for life skill proficiency attainment, consider revising the recruitment and initial advocacy processes for OSY to more tightly integrate provision of life skills lesson during initial encounters with OSY.

FULL EVALUATION REPORT

This report provides data regarding outcomes obtained and services provided by the KY Migrant Education Program (MEP). It is one component of the KY MEP's ongoing work to determine the effectiveness of services to migrant children and youth. The report was prepared by Arroyo Research Services, an education professional services firm that helps education organizations through research, measurement, evaluation, and consulting services.

Purpose

The evaluation builds on the KY MEP Comprehensive Needs Assessment (CNA) and updated KY MEP Service Delivery Plan (SDP). The KY MEP CNA was revised through a broad-based statewide process that culminated in a Comprehensive Needs Assessment Final Report in July 2012. The revised CNA informed development of a new KY MEP SDP in 2013 which was further updated in 2014. The revised SDP contains measureable outcomes and indicators that inform this evaluation plan and associated statewide data collection procedures.

This report discusses preliminary findings from the review of the KY MEP related to three overarching questions (further refined below):

- How is the KY MEP student population changing over time?
- To what extent are programs being implemented?
- To what extent are programs for MEP students producing the desired student outcomes?

In answering these questions, the evaluation seeks to provide a statewide perspective on services and their impact to enable the KY MEP to make programmatic decisions based on data. The local and regional MEP grant application processes provide flexibility to ensure that LEAs and regional centers implement services that meet the needs of their students in the context of district programs and resources. However, the KY MEP provides guidance in identifying evidence-based strategies through the continuous improvement cycle of CNA, SDP, statewide training, and direct consultation with regional centers and districts. The state level evaluation is a status check on progress made in implementing targeted services and in measuring the effectiveness of those services. The evaluation findings are designed to assist the KY MEP in making mid-course corrections to strengthen and improve programs and program outcomes.

The evaluation is also intended to communicate what is known about services and outcomes to various stakeholders. Findings were shared with state education policy makers and regional coordinators in June 2015, and will be distributed to district MEP staff. Preliminary evaluation findings were shared with the Kentucky Migrant Parent

Advisory Council (KMPAC) for discussion with migrant families in April 2015; complete evaluation findings are expected to be shared with the KMPAC in Fall 2015. The report is also intended to communicate with the U.S. Department of Education's OME about the extent to which statutory requirements are met in responding to the needs of migrant youth in achieving challenging academic standards.

The KY MEP is funded under the federal MEP created in 1966 under Title I, Part C, of the Elementary and Secondary Education Act (ESEA), amended most recently in 2001 through the No Child Left Behind Act (NCLB), with the following purposes (defined in Section 1301 of NCLB):

- a) Support high-quality and comprehensive educational programs for migratory children to help reduce the educational disruptions and other problems that result from repeated moves;
- b) Ensure that migratory children who move among the states are not penalized in any manner by disparities among the states in curriculum, graduation requirements, and state academic content and student academic achievement standards;
- c) Ensure that migratory children are provided with appropriate educational services (including supportive services) that address their special needs in a coordinated and efficient manner;
- d) Ensure that migratory children receive full and appropriate opportunities to meet the same challenging state academic content and student academic achievement standards that all children are expected to meet;
- e) Design programs to help migratory children overcome educational disruption, cultural and language barriers, social isolation, various health-related problems, and other factors that inhibit the ability of such children to do well in school, and to prepare such children to make a successful transition to postsecondary education or employment; and
- f) Ensure that migratory children benefit from state and local systemic reforms.

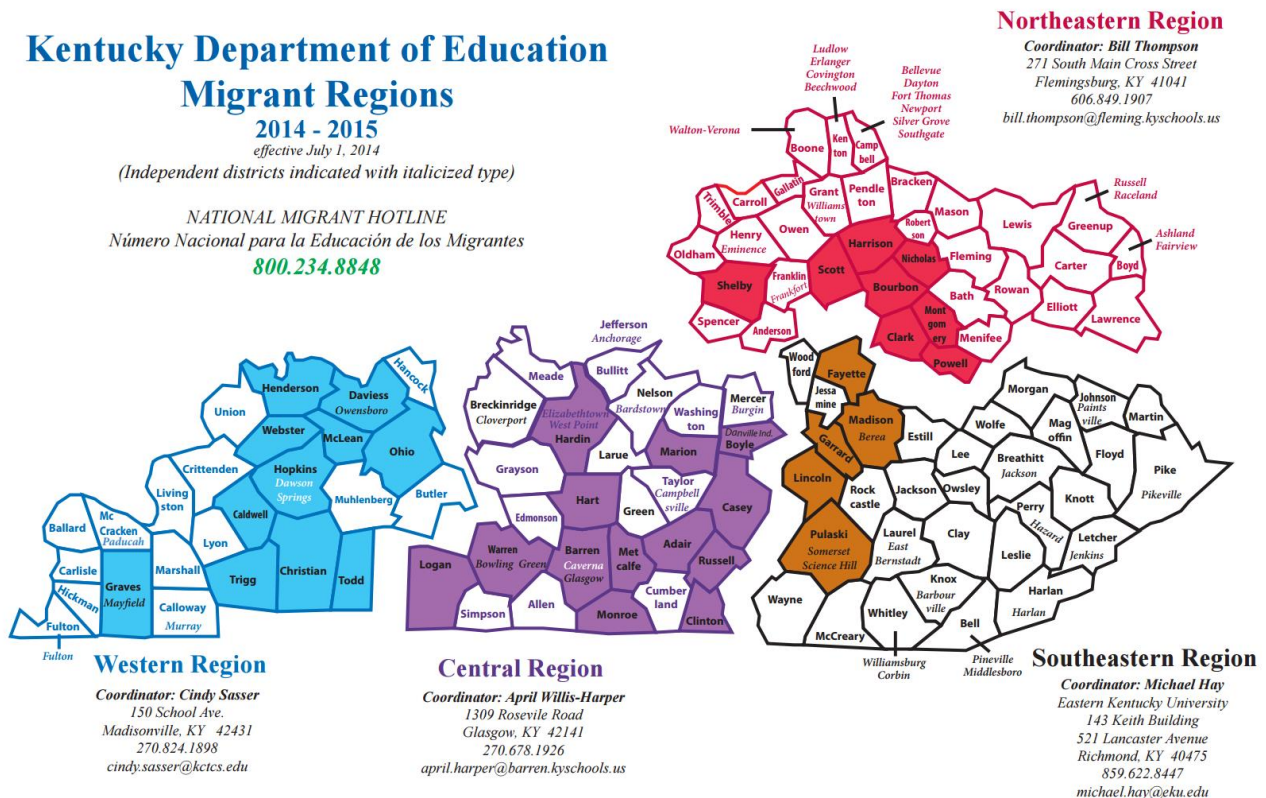

According to statute, a migratory child, in Kentucky, "is one who is, or whose parent or spouse is, a migratory agricultural worker, including a migratory dairy worker, or migratory fisher, and who, in the preceding 36 months, in order to obtain, or accompany such parent or spouse, in order to obtain, temporary or seasonal employment in agricultural or fishing work and has moved from one school district to another" (NCLB Sec. 1309[2]).

The KY MEP provides supplemental educational services to the state's children, youth, and families of migratory farmworkers through this same statute. Under ESEA, the MEP focuses on alleviating barriers to successful educational achievement due to the migratory lifestyle, including disruption in schooling due to repeated moves, poverty, social isolation, and language barriers. The mission of the KY MEP is to provide educational and human resource service opportunities which strengthen and enhance the development of the migrant child and the migrant family.

Program Structure

The KY MEP is administered through the KDE Division of Consolidated Plans and Audits. KDE provides sub-grants to LEAs that apply for MEP funding to administer services at the local level. Currently, the KY MEP consists of 37 school districts administered under four regional administrative centers (see Figure 13). Over 60% of Kentucky's migrant students are concentrated in the northeastern and central regions. Tobacco is the primary agricultural enterprise in the state and remains a top qualifying activity for the MEP, through all stages of labor intensive production from preparing the soil and sowing seeds (February-April) to stripping and bulking (November-January). Services are provided for Pre-K students, K-12 students, and Out-of-School Youth (OSY) who are age 21 and younger and not attending school, and parents.

Figure 13. Kentucky Migrant Education Program Map

Methodology

Approach

The evaluation process is embedded in the MEP's continuous improvement cycle, including the CNA and SDP processes. Under § 200.83 of ESEA, an SEA that receives MEP funds must develop and update a written comprehensive state plan (based on a current statewide needs assessment) that, at a minimum, has the following components:

- Performance targets that the state has adopted for all children in reading and mathematics achievement, high school graduation, and the number of school dropouts, school readiness, and any other targets identified for migrant children;
- Needs assessment to address the unique educational needs of migrant children resulting from the migratory lifestyle and any other needs in order for them to participate effectively in school;
- Service delivery strategies that the SEA will pursue on a statewide basis to address the identified needs;
- Evaluation of the effectiveness of the program (including measurable program goals and outcomes as authorized under Sec. 1306 of NCLB).

This evaluation report is framed to measure the implementation and effectiveness of the strategies and Measureable Program Outcomes (MPOs) outlined in the 2013 SDP as further amended in 2014 (based on the state's initial CNA conducted in 2012). The MPOs were based on a gap analysis between migrant and non-migrant student achievement and are outlined in the sections that follow. The MEP goals address each aspect of the Seven Areas of Concern, and the 2015 evaluation will address those in turn.

During the 2014-2015 period, the evaluation team provided consultation, data collection, and analysis through multiple mechanisms to bolster the capacity of the KY MEP to evaluate its services. These efforts included training on data collection and use, working on site in each region regarding the Service Delivery Plan and the core measures related to it, consultation on data collection and analysis, and review, compilation and analysis of program and outcome data.

Data

Data for this report was drawn from the following sources:

MIS2000

MIS2000 is the KY MEP's student information system. It contains the definitive record of data associated with Certificates of Eligibility (COEs), student enrollment in schools and migrant education programs, and services provided to migrant students. MIS2000 also contains limited data on student academic performance, restricted primarily to state assessment results for migrant students.

Infinite Campus, KDE Assessment Data

KDE provided assessment data for migrant students using assessment data entered into MIS2000. Additional statewide assessment data was obtained from the KDE accountability web site and associated data tools.

Migrant Parent Surveys

Parent surveys created by the evaluation team were used to support the CNA process regarding parent issues, and are used to provide historical information about parents in this report. Parent surveys were administered in 2012 and 2014.

KY MEP Data

During the period under evaluation, the Kentucky MEP instituted a comprehensive data collection process that gathered data from each region and district program regarding the key implementation and outcome measures outlined in the SDP. This data was provided to the evaluation team for use in compiling the results reported herein.

Analysis

The report uses mixed methods that include quantitative and qualitative analyses appropriate to the specific evaluation questions and data. Specific analyses include:

Descriptive Statistics

The evaluators use counts, means, and percentages to describe student enrollment, student characteristics, services provided and student performance.

Trend Data

Where possible, we analyze data across multiple years using identical decision rules, cut points, and data analytical procedures to show comparable data as it changes over time.

Gap Analysis

Analyses of differences between migrant students and other Kentucky students is conducted through a gap analysis and analyses of gap trend data using data for the non-duplicated gap group and other comparison groups as described in each section.

Performance Analysis

Where student outcome data are available, we report it by performance level as determined by the Kentucky state assessment system. This typically includes use of stacked bar charts that compare the distribution of migrant and non-migrant student performance levels across years.

Enrollment Analysis

Enrollment and withdrawal patterns are shown by date in order to better understand the migratory patterns of Kentucky migrant students.

Findings

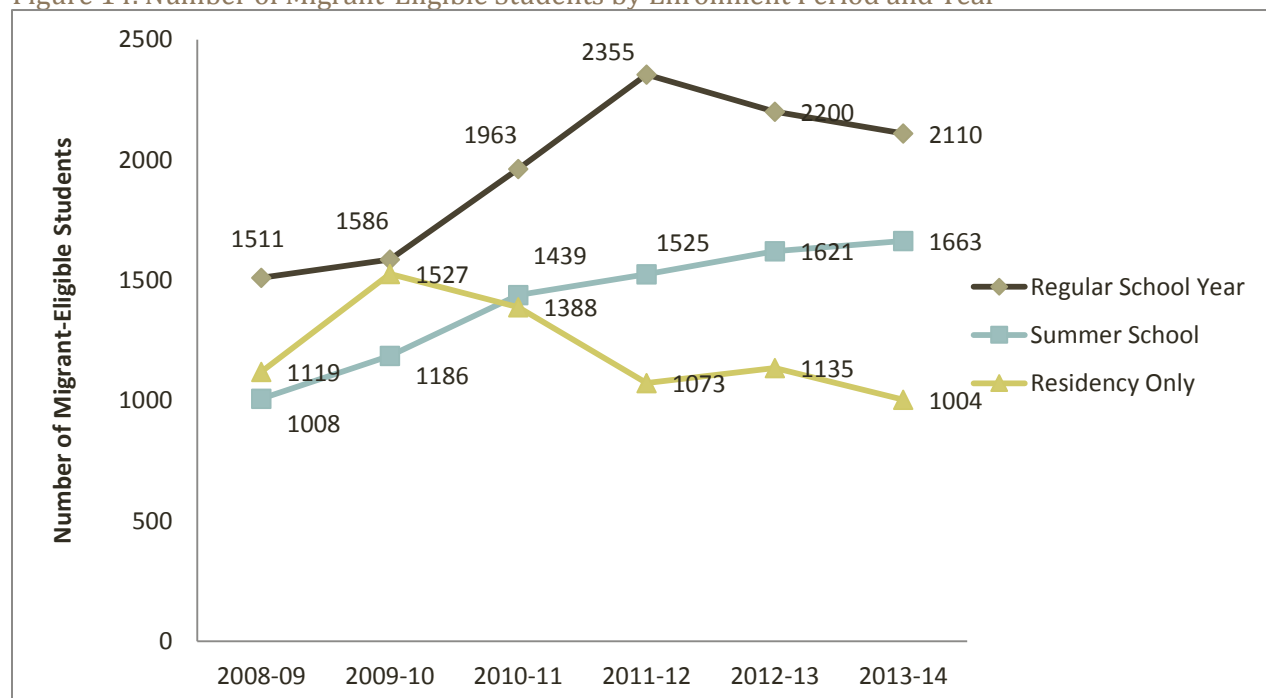

Enrollment

This section presents findings regarding enrollment trends in the eligible migrant student program in Kentucky in order to better understand changes in services provided and outcomes obtained presented later in the report.

The Kentucky Migrant Education Program enrolls students in three separate categories: Regular School Year, Summer School, and Residency Only. Students categorized as Residency Only are typically Out-of-School Youth or pre-school age students. In the charts below, enrollments are presented for each enrollment type. Note that the same student enrolling in both the Regular School Year and Summer School, for example, is represented in each category. Figure 14 shows enrollment by period and year, and shows:

- Regular School Year enrollment declined from 2,355 in 2011-2012 to 2,110 in 2013-2014, a 10% decline
- Summer School enrollment increased from 1,525 in 2011-2012 to 1,663 in 2013-2014, a 9% increase, and has been steadily increasing in each of the last six years
- Residency Only enrollment declined from 1,073 to 1,004 from 2011-2012 to 2013-2014, a 4% decrease

Figure 14. Number of Migrant-Eligible Students by Enrollment Period and Year

Source: MIS2000.

Examining enrollment trends by region shows further information about where enrollment is changing the most. Enrollment figures can be driven by changes in migratory labor, changes in qualifying activities, and changes in recruitment strategies. As seen in Table 8:

- From 2011-2012 to 2013-2014, Regular School Year enrollment declined slightly in the Western region, was steady in the Central region, increased slightly in the Northeastern region, and decreased significantly in the Southeastern region (from 651 to 424, a 35% drop)
- Summer School enrollment increased notably in the Southeastern region, from 234 students in 2011-2012 to 344 in 2013-2014, a 47% increase, and increased in the Western region from 279 to 319 during the same period, a 14% increase
- Residency Only enrollment dropped significantly in the Northeast, from 435 in 2011-2012 to 280 in 2013-2014, a 36% decline, and fluctuated widely each year in the Southeastern region.

Table 8. Percent of Migrant-Eligible Students by Enrollment Period, Geographic Region, and Year

Enrollment Period	Geographic Region ³	Year							
		2010-2011		2011-2012		2012-2013		2013-2014	
		n	%	n	%	n	%	n	%

Examining enrollment by grade level as shown in Table 9 shows that:

- High school students are an increasing proportion of the Regular School year population, changing from 13% of Regular School Year enrollees in 2010-2011 to 17% in 2013-2014.
- The number of High School students also increased in Summer School, from 165 in 2010-2011 to 217 in 2013-2014

³ Counts represent the most recent region in which each student was enrolled per school year.

- Out-of-School Youth declined in both absolute numbers and as a proportion of the overall Residency Only population

Nearly all migrant students in Kentucky are Hispanic or white (see Table 10), and unlike the significant change in the distribution of Hispanic or white students reported in the 2012 evaluation report, the distribution by race/ethnicity was relatively stable from 2011-2012 to 2013-2014. Specific findings regarding race/ethnicity include:

- 99% of Kentucky migrant students are either Hispanic or white
- During the regular school year, the number of white migrant students declined from 659 in 2011-2012 to 532 in 2013-2014, a 19% decline. During this period, however, all migrant enrollments declined, so white students as a proportion of all regular school year students only declined from 28% to 25%.
- During the regular school year, the number of Hispanic students also declined from 1,665 to 1,547, a 7% decline, while the proportion of migrant students that were Hispanic was rose slightly from 71% to 73%.
- Summer school enrollment gains were achieved primarily among Hispanic youth. Overall enrollment in summer school rose from 1,525 in 2012 to 1,663 in 2014. Within summer school, the number of white students enrolled fell from 397 (26%) to 325 (20%), while the number of Hispanic students rose from 1,103 (72%) to 1,313 (79%), from 2012 to 2014.

The US Office of Migrant Education requires each state Migrant Education Program to identify students which are a Priority for Services (PFS), and expects that special attention is paid to these students. The Kentucky MEP updated and clarified the definition of which students would receive this designation beginning in the 2012-2013 school year. Prior year data is therefore not comparable is therefore not presented side-by-side with the 2012-2014 data about PFS students and their services. As shown in Figure 16 and Table 11, 166 students were identified as PFS in 2012-2013 and 208 were identified as PFS in 2013-2014. All identified students were school age. Within the PFS population, a lower proportion of high school students and higher proportion of elementary school students were identified in the 2013-2014 school year.

Services

Within each enrollment period, the evaluators calculated the percentage of students who received each individual service provided by the MEP, as shown in Table 12. Findings related to service provision include:

- The percentage of students served in the Regular School Year rose notably in each area of service from 2011-2012 through 2013-2014
- The percentage of students receiving Regular School Year counseling services or referrals doubled from 2011-2012 to 2013-2014
- The percentage of Regular School Year students receiving mathematics instruction rose 20% from 2011-2012 to 2013-2014
- The percentage of Regular School Year students receiving reading instruction rose 17% from 2011-2012 to 2013-2014
- The proportion of students receiving Summer School instructional services remained relatively constant during the evaluation period
- The proportion of students receiving Summer School counseling, support services and referrals rose dramatically during the evaluation period; for counseling, e.g., 19% of summer school students received this service in 2012 while 43% did so in 2014

Table 12. Percent of Migrant-Eligible Students Receiving Services by Enrollment Period and Year, All Students

Source: MIS2000

Table 13 shows the percent of students receiving services by grade level for the Regular School Year. Findings of note:

- While service provision was generally individualized to meet the specific needs of each student, the overall level of service was very high, with 95% of eligible migrant students in Elementary and Middle School, and 94% of eligible migrant High School students, receiving at least one supplemental service.
- Support services were received by the highest percentage of each grade level
- Although elementary and middle school students were most likely to receive instructional services, a relatively high percentage of OSY received reading instruction, primarily aimed at developing English language proficiency using mini-lessons

Table 13. Percent of Migrant-Eligible Students Receiving Services within Grade Level, Regular School Year, 2013-2014

Grade Level	Service						If Ever Served
	Reading Instruction	Math Instruction	Other Instruction	Counseling Service	Support Service	Referral	
Age 3-5	47	43	35	26	80	69	90
Elementary (Grades K-5)	73	64	49	48	90	75	95
Middle (Grades 6-8)	68	62	48	57	91	80	95
High (Grades 9-12)	59	54	47	60	90	79	94
Out-of-School*	41	29	44	50	85	64	89

Source: MIS2000

Note: * OSY figures are for entire period, not Regular School Year. Services include migrant funded, mixed funded, and other (M, B, O codes in MIS2000).

By design, Priority for Services students are more likely to receive academic services than the general migrant population. As shown in Table 14, 78% of PFS students receive reading instruction, 71% receive math instruction, and 62% receive other instruction, all much higher figures than for the overall migrant student population. In the 2012-2013 school year, 99% of PFS students received services, while 96% of PFS students did so in 2013-2014. Of note, the percentage of non-PFS students increased substantially from 2012-2013 to 2013-2014 in each category; the percentage of PFS students receiving services during the same periods increased in each category except for the already high rates of referral and support services.

Table 14. Percent of Priority for Services (PFS) Migrant-Eligible Students Receiving Services during the Regular School Year, by Year, Grades K - 12

Enrollment Period	Service	Year			
		% served, 2012-2013		% served, 2013-2014	
		Non-PFS	PFS	Non-PFS	PFS
Regular School Year	Reading Instruction	59%	78%	69%	78%
	Math Instruction	54%	65%	60%	71%
	Other Instruction	43%	54%	47%	62%
	Counseling Service	34%	56%	50%	64%
	Support Service	85%	95%	90%	92%

	At least one service*	90%	99%	95%	96%

Source: MIS2000. 2012-2013 PFS n=166, non-PFS students in grades K-12 n=1,857; 2013-2014 PFS n=208, non-PFS in grades K-12 n=1,772

*Indicates percent of students who received at least one type of service.

Collection of additional detailed information about services provided to each student began in September 2014 and will be available for subsequent evaluation reports.

Program Outcomes

The sections that follow address the extent to which the KY MEP has met the state adopted performance targets for migrant youth in reading and mathematics achievement, graduation, kindergarten readiness, and for Out-of-School Youth (OSY). For each section, the evaluators review the State Performance Target for the general population in each area, the Measurable Program Outcome (MPO), progress toward the MPO, and the status of the implementation goals for program services expected to drive progress toward the MPO. The State Performance Target and MPO for each area are specified in the statewide Service Delivery Plan. The State Performance Target indicates the target established by KDE for all students in each subject area. The MPO is the target determined by the KY MEP for migrant students in each area. The evaluators determined and report the status of each MPO and provide a discussion of the data that contributes to that determination. Additionally, in each area the SDP outlines specific implementation measures, sometimes with targets for the statewide migrant education program, which are reported at the end of each section.

Reading Language Arts and Mathematics

State Performance Target

Increase the average combined reading and mathematics proficiency ratings for all students in the non-duplicated gap group from 33.0% in 2012 to 66.5% in 2017.

MPO

Reduce the gap by 3% points per year between migrant students and the reported gap group on the average combined reading and mathematics proficiency ratings. 2012 Benchmark: 26.4% for migrant students, 33.0% for gap group.

MPO Status

Not Met. As shown in Figure 18, the gap between migrant students and the unduplicated gap group which represents students from populations that traditionally underperform the state averages, fell slightly from a 6.6 percentage point difference in 2012 to a 5.8 percentage point difference in 2014. At the same time, the percentage of migrant students performing proficient or higher rose 22%, from 26.4% to 32.3%. Gap group performance, however, also rose slightly during the same period.

Discussion

Kentucky migrant students demonstrated gains in both mathematics and reading proficiency during the period of the evaluation. Results are shown as a weighted average of

reading and mathematics in Figure 18, for reading in Figures 7, 8 and 9, and for mathematics in Figures 10, 11 and 12. Note that the comparison to the “gap group” is to the non-duplicated gap group as defined and published by KDE, which is intended to be a summary figure for the performance of “groups of students combined into one large group whose scores are used to determine whether schools/districts are closing achievement gaps; demographic categories include African American, Hispanic, American Indian/Native American, limited English proficiency, poverty, and disability.” Within the gap group, students in these groups are counted only once per student, even when they are in multiple groups. Additionally, KPREP specific findings of note in the detailed figures below include:

- Although migrant student combined proficiency rose from 26.4% to 32.3% proficient from 2012 to 2014, a 22% increase, the gap group performance also rose, particularly from 2013 to 2014; the gap decreases slightly from 6.6 percentage points to 5.8 percentage points.
- As shown in Figure 19, the percent of migrant students proficient in reading, particularly among non-PFS students, was the largest contributor to the combined proficiency scores, with 34% of migrant students performing at the proficient or higher level in 2014 (36% of Non PFS migrant students, and 19% of PFS migrant students).
- The largest increase in migrant student performance in reading occurred between the 2013 and 2014 KPREP administrations, rising from 29% to 34% proficient, a 17% increase.
- Migrant students were substantially less likely to score at the Novice level in 2014 than they were in 2012, dropping from 61% of PFS students in 2012 to 44% of PFS students in 2014, and 41% of non PFS students in 2012 to 24% of non PFS students in 2014. This was a 28% decline in Novice level results for PFS students.
- The reading performance gap shrunk in the elementary grades (Figure 20), and grew in the middle school grades (Figure 21), from 2012 to 2014.
- Migrant student performance on the KPREP Mathematics assessment showed steady gains from 2012 through 2014, rising from 25% proficient in 2012, to 28% proficient in 2013 and 30% proficient in 2014. This is a 20% gain from 2012 to 2014.
- Migrant students performing at the Novice level in KPREP Mathematics declined from 33% (53% PFS, 29% Non PFS) to 26% (37% PFS, 24% non PFS) from 2012 to 2014, a 27% decline.
- The gap between elementary school migrant students and all Kentucky students and also gap group students on KPREP mathematics grew during the 2012-2014 period (Figure 23).
- The gap between middle school migrant students and gap group and all KY students on KPREP mathematics declined slightly during the 2012-2014 period (Figure 24).

Implementation

Implementation as it relates to each area of the Service Delivery Plan was reported in a new data collection process established for the 2014-2015 program year. Preliminary results are reported in each section as of December 2014. Results for reading and mathematics instructional services are shown in Table 15. Specific findings of note:

- As of December 2014, the KY MEP exceeded its targets for the percent of students with pre and post curriculum based assessment results in Reading/Language Arts (69% versus a target of 66.5%) and the percent of students with pre and post curriculum based assessment in mathematics (70% versus a target of 66.5%).
- Results for the percent of students showing progress are pending a revision to the SDP Data Collection protocol that clarifies this data.
- 69% of summer school students receive at least 80 hours of instruction, a new expectation for summer schools that is beginning to take hold. Although most summer schools are organized to provide at least 80 hours of instruction, not all students are present for the full summer school period and therefore do not always receive this level of instruction.
- The number of students with pre/post curriculum based assessments, and the proportion of PFS students with greater than or equal to two supplemental services contacts per week are notably lower in the western region than in the others.
- The expectation of inter-project communication regarding student transfers is new with the revised SDP, as are the associated definitions and data collection related to it.

Table 15. Instructional Services Implementation Measures, as of December 2014

Measure	Target	Statewide	Central	Northeastern	Southeastern	Western
% of students with pre & post curriculum based assessment results in Reading/Language Arts	66.5	69	78	66	80	46
% of students with pre & post curriculum based assessment results in Math	66.5	70	79	71	77	47

% of MEP students new in the district that participated in welcome and/or mentoring program for new students?		70	67	87	46	72

Graduation

State Performance Target

Increase the average four-year graduation rate from 76% to 90% by 2015. Increase the percentage of students who are college- and career-ready from 34% to 68% by 2015.

MPO

Increase the four and five year cohort graduation rates to 88% by 2015. Increase the percentage of students who are college and/or career ready to 41% by 2015.

MPO Status

Not Yet to Target Date. The MEP progress toward achieving its graduation targets may be hindered by two factors that are endemic to migrant programs. First, the size of the cohort included in the calculation can change dramatically from year to year, and because of the relatively small number of migrant high school students, can fluctuate substantially due to changes in migratory patterns. Second, the state data used to determine migrant graduation rates is considerably more reliable since 2013, and therefore later reporting years are expected to be more stable than earlier ones.

Discussion

Graduation data for migrant and all Kentucky students was drawn from the Kentucky School Report Card (available at <http://applications.education.ky.gov/SRC/>), and includes statewide and subpopulation-specific data for all major state level outcomes. Table 16 includes the four-year cohort graduation rates for students who started grade 9 in 2009 (expected date of graduation: 2013), and students who started grade 9 in 2010 (expected date of graduation: 2014). Reliable migrant student graduation data for prior periods was not calculated following the cohort graduation formula used by KDE. The calculation excludes students who transfer to out-of-state schools, includes students who transfer to other schools within the state, and includes students who transfer in from out-of-state schools but started school during the same period. For example, a student who started grade 9 in 2009 in Florida, and transfers to a Kentucky school in 2011, is included in the 2013 cohort; a student who starts grade 9 in a Kentucky school in 2009 and transfers to a Florida school is not included as a member of the 2013 cohort. Table 17 shows the percent of migrant and Gap group students who are determined by KDE to be College and Career Ready in the 2013 and 2014 cohorts. Findings and comments regarding graduation:

- The graduation rate for the all students and migrant students group increased slightly from 2013 to 2014 while the graduation rate for migrant students declined by 10 percentage points.

- Very little definitive data is available about non-school factors that are affecting migration, high school drops without migratory moves, or other events driving the graduation rate for migrant students.
- Migrant students demonstrated approximately the same level of College and Career Readiness as defined by KDE in 2013 and 2014 (30%, Table 9), which the CCR rates for the gap group increased from 40% to 50%.

Table 16. Four-Year Adjusted Cohort Graduation Rates, Expected Date of Graduation 2013 and 2014⁴

	2013	2014
All Students	86.1	87.5
Migrant	85.7	75.3

Source: KDE State Report Card, accessed 5/2015 from

<http://applications.education.ky.gov/SRC/DeliveryTargetByState.aspx>

Note: for Migrant cohorts, n = 56 for 2013, n=81 for 2014.

Table 17. Percent College and Career Ready, Expected Date of Graduation 2013 and 2014

	2013	2014
Migrant	30.6	30.0
Gap group	40.0	49.9

Source: KDE State Report Card, access 5/2015 from

<http://applications.education.ky.gov/SRC/DeliveryTargetByState.aspx>

Note: for Migrant CCR, n= 36 for 2013, n=40 for 2014. For Gap group CCR, n=23,653 for 2013; n=24,135 for 2014.

Implementation

Starting in the 2014-2015 program year, the KY MEP promoted and tracked implementation measures related to graduation that included support for assuring migrant students were on track with state-wide individual learning plans, supporting migrant students in completing checklists associated with college and career readiness and learning goals, and assisting migrant students in engaging in extra-curricular activities. The program expects MEP advocates to work directly with high school students to keep them on track, engaged, and moving toward graduation. Targets were not established in the SDP for graduation related implementation activities. Preliminary results are shown in Table 18. Specific findings of note include:

⁴ KDE defines the four-year adjusted cohort graduation rate as follows: "...the number of students who graduate in four years with a regular high school diploma divided by the number of students who entered high school four years earlier adjusting for transfers in and out, émigrés and deceased students."

<http://education.ky.gov/AA/Reports/Pages/Graduation-Rate-Data.aspx>

- Students with on track ILPs were relatively even across regions, with 65% of migrant students statewide on track with the goals established in their ILPs
- Central region migrant students were more likely than those in other regions to have up to date ILPs and to have at least 75% of CCR checklist items completed
- Migrant students were less likely to participate in high school activities in the Southeastern region than in other regions

Table 18. Graduation Related Implementation Measures, as of December 2014

Measure	Target	Statewide	Central	Northeastern	Southeastern	Western
% of migrant students on track with the goals established in their ILPs.		65%	68	61	63	67
% of secondary students who have up-to-date ILPs.		66%	75	57	61	63
% of MEP secondary students with at least 75% of the CCR checklist items completed.		46%	62	41	35	30
% of secondary migrant students that participated in high school activities.		50%	52	52	39	54

Preschool

State Performance Target

Increase the percentage of children ready for kindergarten from 28.1% in 2012 to 64.1% in 2015-16.

MPO

Increase the percentage of migrant preschool students demonstrating kindergarten readiness by 15% of the baseline established in the fall 2013.

MPO Status

Baseline established; progress data not yet available. Baseline results for the Kentucky Kindergarten Readiness Assessment were first available from Fall 2013 and are shown in Table 19. Results are broken out by whether or not a student received MEP services or enrolled in a Pre-kindergarten program in the 2012-2013 school year. As of Fall 2013, 23.5% of migrant pre-school students who entered kindergarten tested as kindergarten ready on the Brigance Screener.

Discussion

Kentucky first established a statewide kindergarten readiness assessment in Fall 2013, providing the KY MEP the opportunity to use an objective statewide readiness measure for the first time. Baseline was established with the initial data shown in Table 19. The evaluation team combined Kindergarten readiness data with service participation data to group results by the types of migrant and preschool services each migrant child received prior to enrolling in kindergarten in Fall 2013. Initial observations include:

- Overall, 23.5% of migrant students were deemed ready for kindergarten on the statewide kindergarten readiness assessment
- 25% of migrant students who received MEP services performed at the Ready or above levels, while 22% of migrant students enrolled in PreK programs and 17% of students who did not receive services did so
- Interpreting results by service type is difficult due to both the relatively low sample size for students participating in preschool, and a lack of information about on what basis students were enrolled in preschool programs; that is, nothing is known about the general preparedness of the students at the time they entered each program

Table 19. 2013 Kentucky Kindergarten Readiness Assessment Results, Migrant Kindergarten Students by Pre-school Services Received

		Not Ready	Ready	Ready with Enrichments	Total
Received MEP Services	Count	121	39	1	161
	%	75.2%	24.2%	.6%	100%
Enrolled in PreK Program	Count	14	4	0	18
	%	77.8%	22.2%	.0%	100%
Did Not Receive MEP Services	Count	25	5	0	30
	%	83.3%	16.7%	.0%	100%
All Migrant Students Total	Count	160	48	1	209
	%	76.6%	23.0%	.5%	100%

Implementation

Table 20 shows results for preschool implementation measures recommended by the SDP, with target rates for all except the percent of preschool age students enrolled in school. Specific results of note include:

- Statewide results exceeded the target in 4 of 5 areas as of December 2014
- 63% of migrant preschool students were assessed using the adopted preschool screener; each region exceeded the target
- 70% of migrant preschool students received supplemental support, just short of the target of 75%
- 76% of migrant preschooler students participated in summer learning, easily surpassing the state target of 50%; not clear is the extent to which Western region differences in participation are due to actual differences in services provided, or differences in what is being reported
- More than twice the percent of migrant families as targeted participated in home-based support services (67% versus a target of 25%), including 91 percent of families in the Southeastern region
- 76% of migrant families received educational resources and training
- Statewide, 61% of preschool age students enrolled in school

Table 20. Preschool Implementation Measures, as of December 2014

Measure	Target	Statewide	Central	Northeastern	Southeastern	Western
% of migrant preschool students assessed using the Kentucky Adopted Preschool Screener (Brigance)	50%	63%	72	59	59	60
% of migrant preschool students receiving supplemental support.	75%	70%	67	76	72	64
% of migrant preschoolers participating in summer learning.	50%	76%	92	79	79	42
% of migrant families participating in home-based support services.	25%	67%	64	48	91	70
% of migrant families receiving educational resources and training.	50%	76%	66	77	88	75
% of preschool age students enrolled in school		61%	70	57	54	63

State Performance Target

Provide and coordinate support services that meet the needs of all students.

MPO

- 3) Increase the percentage of OSY who demonstrate a 20% learning gain measure by pre- and post-test assessment on the SOSOSY “Life Skills” mini-lesson by summer 2014.
- 4) Increase the percentage of OSY who are participating in structured education programs to 4% by summer 2015.

MPO Status

- 3) OSY with 20% learning gain: as of summer 2014, 89% of OSY who completed a mini-lesson with a pre-post assessment demonstrated 20% learning gains or higher.
- 4) OSY participating in structured education programs: ***Not Yet to Target Date***. As of summer 2014, using data for the 2013-2014 school year, the baseline for this measure was 3% of OSY reporting as enrolled in a structured education program (GED or HS Diploma).

Discussion

Comprehensive data regarding which OSY received SOSOSY Life Skills mini-lessons associated with their pre and post test results was fully implemented in the 2013-2014 school year and reported to the KY MEP program using individual program reporting forms. Of the 228 students that received mini-lessons, 202, or 89%, demonstrated a 20% gain on the pre-post assessment associated with the lesson⁵.

Regional programs reported the number of OSY who were enrolled in structured educational programs, including dropout recovery and GED programs. As of summer 2014, reflecting data for the 2013-2014 school year, 3% of OSY were enrolled in programs that lead to either a GED or a HS Diploma.

⁵ KYMEP SASS and Tracking Form Combined, 2014.

Implementation

Implementation measures specified for OSY are reported in Table 21, while instructional support services and general support services, respectively, are reported in Table 22 and Table 23. Key findings regarding SDP indicators and services include:

- The KY MEP engendered significant participation in OSY services during the reporting period
- Participation in Life Skills lessons was more than double the target, with 64% of OSY participating compared to a target of 25%
- The KY MEP is not yet to the target for the % of OSY that gain proficiency with at least one life skills lesson within 30 days of completing the OSY Profile, with 59% achieving this compared to the target of 75%; 2 of 4 regions exceeded the target, 2 were significantly below it
- The KY MEP nearly attained its target of OSY who receive more than 20 hours of English instruction demonstrating increased language proficiency on the SOSOSY English Language Screener (71% versus 75% target), although the sample size of OSY who meet the threshold number of hours is very low and therefore subject to high levels of variance; most of the OSY who meet the threshold are in the Central region
- GED participation and success levels are based on very small numbers of OSY, and are relatively new to the program; we anticipate that as this effort and associated data collection matures the program will improve and be better able to establish appropriate goals.
- Given the highly mobile and work-focused nature of the OSY population, the evaluators find that relatively high percentage of OSY received services from the KY MEP
- Among all OSY, 29% received reading instruction, 24% received math instruction, and an additional 35% received instruction in English as a second language.
- The KY MEP provided material support services to 53% of OSY and nutrition and health services to 27% of OSY

Table 21. OSY Implementation Measures, as of December 2014

Measure	Target	Statewide	Central	Northeastern	Southeastern	Western
% of OSY receiving “Life Skills” mini-lesson services to promote life skills	25%	64%	83	30	56	82
% of OSY that gain proficiency with at least one mandatory life skills lesson, as measured by the pre- and post-test for that lesson, within 30 days of filling out the OSY Profile	75%	59%	79	32	26	79
% of OSY in the KYMEP who receive more than 20 hours of English instruction will increase their language proficiency scores on the SOSOSY English Language Screener	75%	71%(14) ⁶	100 (8)	NA(0)	40(5)	0(1)

% of all OSY	53%	27%	15%	6%	21%	11%

Note: for OSY receiving any service, n=392; for all OSY, n=610.

Kentucky is a member of the OSY Consortium and uses the OSY Profile developed by the Consortium. Summary results from the 2012-2013 and 2013-2014 program years are presented below. These results show demographics, needs assessed, and services provided for OSY recruited during the reporting period. Key findings from the OSY Profile data include:

- The majority of OSY (76%) last attended high school
- 73% of OSY are 19 years of age or older
- OSY report that their access to transportation is increasing, with most having access to transportation (67% in 2014)
- The percent of OSY who are English language proficient declined from 2013 to 2014, from 15% to 11%
- There was no meaningful change in home language, with 92% speaking Spanish at home
- Very few OSY had identified needs in the areas of medical, vision, dental or urgent care (2% or less in each area, Table 26), or in the areas of legal or childcare (Table 19)
- Transportation was the highest advocacy need reported (17%)
- Although learning English remained the most frequently expressed service interest, it declined from 2013 to 2014 from 46% to 39%
- Housing indicators were very similar from 2013 to 2014, with most OSY reporting that they lived with a crew
- In general, OSY were more likely to be identified as a candidate for service in 2014 than in 2013, with, for example, an increase in candidates for ESL rising from 174 to 233, for Life Skills from 30 to 94, and for MP3 based lessons from 54 to 105.
- Materials provided/received remained relatively stable from 2013 to 2014

Parent Involvement

Although the SDP does not contain MPOs for parents, it does specify a parent involvement plan that continues to build local Parent Advisory Councils (PACs) and increase the functioning of the statewide PAC. As a part of this effort, the KY MEP has continued to administer statewide parent surveys that address key areas of concern identified in the Comprehensive Needs Assessment process. This section presents the results of the 2014 statewide parent survey. Results for rating scales are provided twice, once in table format, and again as a stacked bar chart which helps make sense of how responses are distributed among the options. Key findings from the survey:

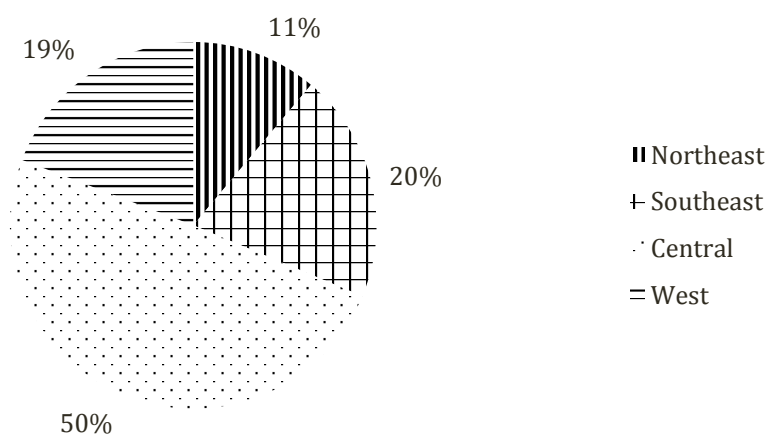

- 321 parents responded to the survey
- Most survey respondents were from the Central region (50%)
- More than half attended at least one training on how to help their child improve in school; 65% attended a school event
- 87% of parents report having discussed their child's academic or social needs with a school official
- 80% report assisting with their child's homework at least once a week; 81% report daily talking with their child about school
- A very high percentage of parents report that they feel welcome when they visit their child's school (88%) and that they know who to talk with when they have questions or concerns about their child at school (89%)
- Migrant parents report very high levels of satisfaction with migrant programs to help with their child's education at home (93%), services their child receives from the migrant program (97%), and services they receive from the program as parents (98%)
- 37% of parents report communicating with migrant education program staff at least once a week

Receive MEP services	9 %	29 %	33 %	11 %	4 %	5 %	5 %	4 %	284

Recommendations

The Kentucky MEP has made significant progress in strengthening its Statewide Service Delivery Plan and the implementation support and data collection that support it. These results are evident in the progress noted above. To further strengthen the program and enable ongoing review of its data by all parties to the KY MEP, we recommend the following:

Data Collection

- Change the SDP Data Collection protocol as it relates to pre-post curriculum based assessment so that it clearly asks for the number of students who demonstrated progress on the pre and post curriculum based assessments.
- Add enrollment in a GED or HS Diploma program for OSY as a field in the statewide migrant data system
- Revise the data collection process for OSY services, mini-lessons and assessments so that it can more easily be summarized and examined while in progress.
- Consider adding fields to the statewide migrant data system that enable collection of as much of the SDP indicator data as possible within the records attached to individual students, with attendant reports that allow ongoing insight into how each program and the state as a whole is progressing.

Program Improvement

- Consider adding a regular school year supplemental services commitment that establishes baseline expectations for the level of service (e.g. contacts or hours per time period) that LOAs are expected to provide to eligible migrant students. This is especially critical for PFS students to assure that they receive services commensurate with their educational needs. The evaluators note that a service level commitment has been made for summer programs (80 hours), but not for the regular school year.
- Consider adopting a statewide set of recommended practices for when and how to use curriculum-based or formative assessments. The evaluators note that LOAs, at the urging of the State MEP, have been using and tracking the use of local assessments, but that the practices associated with when to do so, how to use results, and how they relate to MEP services varies widely by region.
- Although the state MEP has provided guidance regarding what constitutes and how to track new migrant student welcoming/mentoring, if this remains a part of the migrant program the evaluation team recommends providing further guidance, professional development and sharing regarding recommended practices for new student transitions.
- The KY MEP has made significant improvement in identifying and servicing migrant preschoolers in summer learning programs, and reports relatively high rates of preschool age students enrolled in school. However it is not clear that the reported

rates of preschool enrollment mean the same thing in each region, nor that they tightly match the state level records for preschool enrollment. To bolster preschool enrollment, and to more fully engage families of preschool migrant children in educational activities, the evaluators recommend establishing a statewide emphasis on migrant preschool and kindergarten enrollment assistance, with guidelines and opportunities for professional learning made available from the state MEP.

- To assist in meeting KY MEPs targets for life skill proficiency attainment, consider revising the recruitment and initial advocacy processes for OSY to more tightly integrate provision of life skills lesson during initial encounters with OSY.
